

Senior Drupal Developer

Asheville, NC or Charleston, SC

The Baldwin Group, Inc. (TBG) (www.tbgroupconsultants.com) seeks a talented Web Designer with experience implementing a web content management system (Drupal). This position will support our contract with the NOAA Coastal Services Center (www.csc.noaa.gov) and the NOAA National Climatic Data (www.ncdc.noaa.gov). The position requirement is to understand, maintain, and enhance the content management system for the NOAA Climate Services web site (www.climate.gov). Inherent in this requirement is the ability to work with non-technical team members to understand system-specific requirements, and continue to build a flexible and scalable content management system. This position can be located in either Asheville, NC or Charleston, SC.

Required Qualifications

- Documented experience developing moderate to complex Drupal-based content management systems, specifically the following:
 - Drupal styling and theming
 - Content workflow creation
 - Custom content types & fields
 - Custom module creation
 - Management with Drush
- Expert-level experience with standard web technologies (HTML, CSS, JavaScript).
- High degree of comfort with Linux shell (bash)
- Experience administering relational database systems (MySQL)
- Familiarity with version control (Git, Subversion)

Desired

- Experience with Agile development.
- Familiarity with continuous integration / deployment technologies (Jenkins / Hudson)
- Working knowledge of Java / JSP
- Familiarity with Apache SOLR and semantic web technologies
- Flash/Flex experience.
- Geographic information systems experience.
